Tembusan Yth.:  
- Rektor UB

**Letter of Intent  
between  
Faculty of Mathematics and Natural Sciences  
Brawijaya University  
and  
College of Life Sciences  
Ritsumeikan University**

In 2006, Brawijaya University and Ritsumeikan University entered into an agreement to cooperate in education, research, and other associated activities in order to promote academic and cultural exchange. Although this agreement endures, there has unfortunately been little actual exchange in the field of life sciences at the undergraduate or graduate level over the last five years.

The 21<sup>st</sup> century is being called the "Life Sciences Century," so it is increasingly important both to cultivate our students and researchers to become leaders for this research field, both in Indonesia and Japan, and to produce measurable achievements that will benefit society.

This Letter of Intent is to seize this opportunity to further develop our exchange relationship in the field of life sciences between the Faculty of Mathematics and Natural Sciences, Brawijaya University and the College of Life Sciences, Ritsumeikan University, based on the 2006 university-wide Agreement of Cooperation.

Marjono  
Dean, Faculty of Mathematics and  
Natural Sciences  
Brawijaya University

Tadayuki Imanaka  
Dean, College of Life Sciences  
Ritsumeikan University
